

Device as a Service

A complete circular solution with one partner

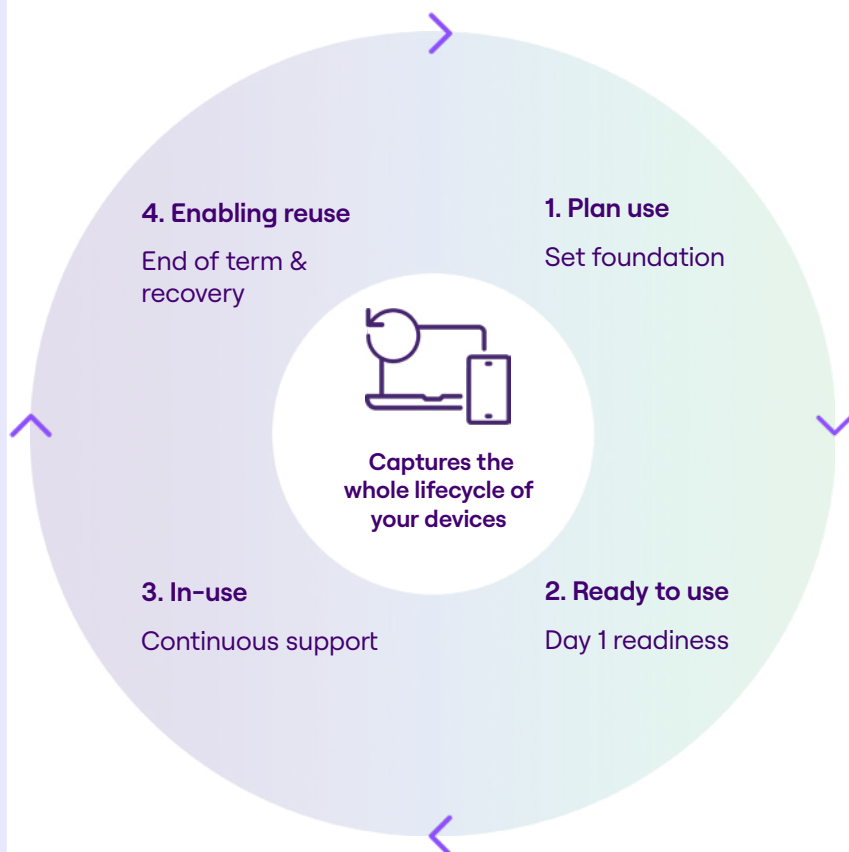

Device as a Service (DaaS) by Foxway brings everything together through one global partner and one platform. With our in-house circular model, we extend the lifecycle of devices while reducing the carbon footprint.

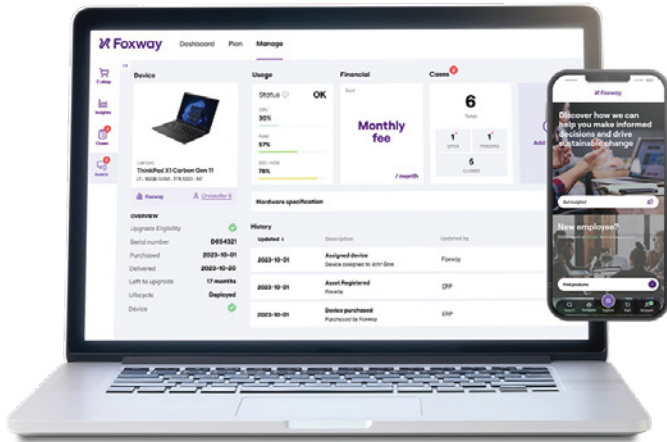

Choose both **new and premium refurbished devices from world-leading brands**, combined with our efficient services, for full end-to-end value creation. With Foxway, you gain control in a simple, secure, cost-efficient, and more sustainable way.

A complete solution

- **Full lifecycle management**
From planning and onboarding to use and reuse. All with secure data erasure processes (Blancco)
- **One platform**
For procurement, asset management, data and insights
- **Maximum utilization**
Devices ready to use, on demand securing productivity
- **Global service and logistic capabilities**
reaching +130 countries
- **Device and services in a cost efficient way**
A predictable and competitive monthly fee per device

One platform enabling total control

Procurement and full scale asset management with granular data, reporting and insights. Visibility down to user level.

- Device performance data
- Financial data
- Environmental data

Sustainability without compromise

Premium refurbished devices from world-leading brands with documented CO₂e reduction.

Securely processed in-house to premium condition with quality comparable to a brand new device.

Up to **95%** lower carbon footprint for a refurbished device compared to a new device*

Up to 3 years warranty for laptops and up to 2 years for mobiles, including battery
 Cost-effective alternative from start to end-of-term

Turning data into environmental compliance and impact

- **Environmental data** to comply with market regulations: e-waste and CSRD requirements
- **Granular reporting** to better show improvements in CO₂e emissions and CO₂e savings
- **Transparent insights** on returned devices, including share of reused/ recycled

Proactive decision-making enabling measurable effect
