

Accessibility Audit

Why conduct an accessibility audit now?

Every student deserves the opportunity to reach their full potential. As schools become increasingly digital, it's more important than ever to ensure that teaching and learning are accessible to all students—regardless of their individual needs. An Accessibility Audit provides a clear and practical overview of how well your educational and digital environments support diverse learners.

This isn't just another project—it's about getting the right support to do the right things, the right way.

Purpose

To evaluate how your school currently identifies and supports students with special needs, and to demonstrate how technology and pedagogy can work together to enhance accessibility and equity.

Goals

- Establish a shared understanding of the current situation
- Identify barriers and enablers in both learning environments and teaching practices
- Provide concrete examples of how digital tools can offer support
- Formulate improvement suggestions linked to curriculum requirements and quality assurance

Suggested process

Step	Content	Duration
1. Introduction	Meeting with school leadership and student health team	1 hour
2. Data Collection	Observations and interviews with staff and students	1-2 days
3. Analysis	Summary of findings, identification of strengths and needs	Internal
4. Feedback	Workshop with actionable recommendations	1 hour

Focus areas

- Pedagogical support and differentiated instruction
- Digital accessibility (iPad/Mac, built-in accessibility features)
- Physical and social learning environments
- Use of Apple technology and AI support (Apple Intelligence)

What are the benefits?

- A solid foundation for your school's systematic quality work
- Improved goal achievement and greater student engagement
- More effective use of existing technology
- Ability to plan targeted, sustainable actions

Ready to Take the Next Step?

We offer a complete audit package tailored to your school's specific needs. Our Apple Professional Learning Specialists will guide the process—placing pedagogy, technology, and accessibility at the core.
