

Apple Teacher Team –

Work smart with iPad for improved learning

An effective team creates the conditions for individuals to dare to try new methods, build on others' ideas, and be challenged by colleagues.

It's easier to work strategically and ensure tasks are completed when working together as a team.

An iPad is an incredibly creative digital tool with endless possibilities—once you understand and have knowledge of everything it offers from the start. In this course, we work with entire teaching teams to foster collaborative learning.

Each session includes practical walkthroughs and discussions on how to use the iPad in the classroom. Between sessions, participants are expected to practice something covered and present it at the next meeting.

Target audience:

Teaching teams in preschool and school

Structure:

October

Strengthen children's learning

Accessibility tools – Adapting our iPads

Camera – Bringing reality into the classroom

AR (Augmented Reality) – Enhanced reality

Pages – Create multimodal content

November

Creative & collaborative work

Clips – Create with images, videos, and text

Greenscreen by Do ink – Blend fantasy and reality

January

Involve all children

Kartor – Bring the world into the room

QR-koder – Find the right thing easily!

Garageband – Create multimodal content

March

Teach-Meet

Final session – Participants present and showcase what they've done to each other and/or other teaching teams.
